

## Horizon Pass Lodge at Bachelor Gulch

Horizon Pass Lodge is sited in a saddle at the highest elevation in the valley with a panoramic view of the Gore Range in the Colorado Rocky Mountains. This lodge acts as the icon for the Bachelor Gulch ski resort. Taking its cues from the masterful and grand lodges of the National Parks System throughout the west, the building mimics the mountain silhouettes, while exterior materials mirror the textures in the landscape.

Thirty-one spacious units range in size from one to six bedrooms. A penthouse suite occupies the central conical roof. Most upper floor units extend from one side of the building to the other to take advantage of the views.
