

**Ian Wilson**  
Senior Associate

Ian works diligently to deliver projects that are responsive to the client's goals, meet budgets and schedules, incorporates simple beautiful efficient design and strives to exceed expectations in design and throughout construction. Ian's design philosophy is a careful analysis of scale and proportion, massing and details and asking questions and research to apply those facts to start a rapid procession of design collaboration into a final nurtured design.

Ian has worked in a broad range of projects types and scales; this has given him the ability to create inspiring user centric spaces that benefit the end user. He is always learning and teaching him new software that helps enhance the productivity of the office, project and keep the designs on the forefront of the built environment.
